

LOCAL MANUAL CONTROL (PLUNGER TYPE)

The Local Manual Control Plunger Type features a local lever driven push rod that depresses a schrader check valve through the latching solenoid when fitted onto the top of the solenoid, thereby venting the pressure from the top of the piston in the cylinder valve, allowing the piston to slide upward and commence cylinder discharge.

- Use for manual actuation of cylinder
- Equipped with safety pull pin to prevent accidental discharge
 - Solid brass construction
 - Stainless steel operation lock-pin
