

## UNIQUE DRY POWDER REFILLING MACHINE

**RM10,800.00**

UNIQUE Dry Powder Refilling Machine is designed for filling various sizes of portable dry powder fire extinguishers. It consists of a powder tank, suction pump, motor and filter.

UNIQUE Dry Powder Refilling Machine is rigidly constructed to provide stability while refilling cylinders as well as convenient portability when required. The set of two heavy-duty wheels at the back of the base platform allows the machine and cylinders to be easily moved to and parked at another location.

### Features

- **Simple to operate.** No complicated instructions.
  - Easy to move the machine around.
  - Adjustable machine height to fit cylinder size.
- **Direct recycling of powder.** No pollution of surrounding area.

**SKU:** N/A | **Categories:** [Filling Series for Fire Extinguisher](#) | **Tags:** [Filling Series for Fire Extinguisher](#)

## PRODUCT DESCRIPTION
